President's Palaver

By Susie Sutton, Vice President

We are meeting at Botanic for the February meeting and I'm excited to see everyone again; let's just hope the weather holds out. Many of you may be wondering why I'm filling in for Greg; he had surgery at the end of January and while his recovery is slow, he is doing well. As Vice President filling in, I get to write, or ramble on for the President's Palaver and lead the meeting. Fortunately, with the meeting I at least have a template to follow.

Thank goodness for the orchids and other plants I keep indoors; I don't know about you but they helped keep me sane during that last freezing spell and snow storm. We only had three plants in bloom but to see all of the greenery was just an instant mood changer after coming from outside where everything is dead and 5 degrees (not including the wind chill). I'm sure those with greenhouses are taking advantage of their warm temperatures for as long as possible.

Have you ever wondered what palaver (from the article title) meant? Every month I read this and wonder what it means and say I'll look it up later; and we all know later never comes. I decided I would do it today. I learned the word can be a noun or verb and found a few of the definitions are: a conference or discussion; profuse and idle talk, chatter; persuasive talk and to talk profusely and idly (taken from Dictionary.com). I think this describes my article this month and probably many of those I will write in the future as President. Let's all hope Greg recovers quickly so he can take back over the typewriter.

February 2022

Kansas Orchid Society Meeting Minutes December 12, 2021

(this is a repeat from last month, since we did not have a January meeting, these minutes will still need to be approved.)

The meeting was called to order by President Greg Tompkins at 1:00 pm at the Haysville Senior Center.

<u>Minutes:</u> Max Thompson moved to accept the minutes as published in the last newsletter. Wanita Wright seconded the motion. The minutes were unanimously approved as presented.

<u>Treasurer's Report</u>: none <u>Committee Chair Reports:</u> none <u>Old Business:</u> none <u>New Business:</u> Sarah Pratt presented a list of officers and directors for 2022 as follows:

Greg Tompkins, President Susie Sutton, Vice President Kathy Ethridge, Treasurer Susan Tompkins, Secretary

Directors: Richard Vanderlip (end of term 2023) Elisabeth Vanderlip (end of term 2023) Elsie Dalziel (end of term 2022) Chad Sutton (end of term 2022) Theresa Harrison (end of term 2024) Wanita Wright (end of term 2024)

There were no further nominations and there was a unanimous voice vote to approve

Announcements

There will be a Board Meeting on January 16 starting at 1:30

Meeting adjourned to enjoy our delicious Christmas dinner then on to the rowdy game of Orchid Bingo. Great fun was had by all and we now have new plants to enjoy.

Respectfully submitted, Susan Tompkins, Secretary

Newsletter Articles

If you have articles, please send them on or before the 5th of the month to Sarah Pratt at <u>svcsjp@gmail.com</u>

Orchids in the Wild Kathy Ethridge, Conservation Rep.

In the August 2021 the KOS Newsletter reprinted an article on the invasive orchid species *Epipactis hellborine* was had been shared by Richard and Elizabeth Vanderlip.

A native species in this same genus that is **not** invasive is *Epipactis gigantea* sometimes called the stream orchid. It is found near lakeshores, stream sides and seeps in the Midwest, requires constant moisture, and can grow up to three feet tall. It blooms from late June through August and is one of the most colorful members of the genus. The slender stems hold green, yellow, purple and orange flowers throughout the summer. In the Black Hills and Wyoming they can be found around hot springs. This orchid has been propagated commercially.

Epipactis is the ancient name for hellebore. A common name for *Epipais gigantea* is the Western False Hellebore.

Epipactis gigantea Western False Hellebore Native to the United States

Epipactis helleborine Native to Europe and Asia Considered an alien invasive species in the Western Hemisphere

Spring Orchid Show Schedule

 March 26 & 27: Omaha Orchid Society Lauritzen Gardens – Omaha Botanical Center
April 30 & May 1: KOS/SWROGA Botanica, the Wichita Gardens
May 7th, Oklahoma Orchid Society Wil Rogers Gardens, Oklahoma City

Tickets will be available online starting March 1st, 2022 and on-site at the Spring Members Meeting/ Centennial Celebration event.

Further details will be shared soon - be on the lookout for updates!

AMERICAN ORCHID SOCIETY - 1921 TO 2021 100 Years of Global Leadership in Creduly

Per AOS notes: There are three types of vandas: strap-leaved, semi-terete and terete. The first type has broader, flat leaves, while terete types have round, pencil-shaped leaves. The semi-teretes are hybrids between the two, with an intermediate leaf shape. Terete types need full sun, and are best grown in high-light climates. In a greenhouse, give the plants about 25 to 35 percent shade, less in winter if overcast. Leaves should be a medium green, not dark green. In warm, bright climates, you can grow any type of Vanda outside (if warm) with partial shade for strap-leaved types and semi-teretes (especially in midday in summer) or inside (when cold) in a bright, south window. In climates where winters are overcast, try ascocendas. Grow them outside in summer and in full sun inside during the winter. Be careful to aclimatize plants to avoid burn.

Wednesday, February 23, 2022 8:30 PM EST

Greenhouse Chat - Join Dr. Ron McHatton, AOS Chief Science Officer, as he answers your questions about all things orchids. Have your

questions answered by our resident orchid expert! Please send your queries to greenhousechat@aos.org two days prior to the chat. *Open to all*.
